

SAUNA CRAFT HI-LIMIT RESET

Capillary Type (green stem/button).

Typically, when heater hi-limit trips, the control will still work. controls with pilot light or digital display should still be "on", but there will be no heat.

Using a pencil or similar, press the green button slight. The heater should re-set and begin working immediately.

If hi-limit trips repeatedly, call a service technician or call for trouble-shooting assistance.

<p>SP LR 641B1</p> <p>CAUTION 12 sq.ft.</p> <p>Minimum Floor area for this heater. Minimum ceiling height = 78 inches Use supply wire suitable for 75°C.
