Performance Features of Amerec AK Generators

- Sequential Temperature Control delivers a more consistent flow of Soft Steam and a more stable, comfortable steam bath experience.
- AK generators can be connected together to heat steam baths steam baths up to 1500 cubic feet.
- 240 and 208 volt models can be wired in the field for 1 or 3 phase power.
- Stainless steel tank and water level probes provide years of trouble-free operation.
- Removable heating elements provide easy and economical service.

How to select the proper AK generator kW size:

Step 1 Calculate the cubic footage of the steam room by multiplying Length x Width x Height = cubic feet. (Maximum recommended ceiling height is 8')

Step 2 If wall and ceiling surface material is natural stone (marble, granite, slate, travertine, etc.) multiply cubic footage in Step 1 by 1.75 = cubic feet.

Step 3 Select the appropriate kW size generator based on cubic footage range below.
